

#3 MISIF/NI/IMOA WEBINAR

HEAT EXCHANGERS FOR PROCESS AND HYGIENIC INDUSTRIES by DR. GRAHAM SUSSEX

WEBINAR OVERVIEW

Heat exchangers can be tiny or large but they all transfer heat across a boundary rather than direct injection of hot fluids. They are used in chemical, process and food industries and the multiple designs reflect the particular requirements of those industries. Fouling of the transfer surfaces and thermal conductivity are important but the ability to fabricate and clean surfaces must be considered. The webinar will concentrate on stainless steels examples but mentions other CRAs such as CuNi and titanium.

ABOUT SPEAKER

Dr. Graham Sussex, Technical Specialist and Nickel Institute Consultant

Dr. Graham has worked in materials engineering and corrosion prevention since 1979. First, at the Corrosion Centre of the University of Manchester, Institute of Science and Technology (UMIST), UK, then as an industrial materials consultant in Australia since 1987. From 2001, he has been the Technical Specialist for the Australian Stainless Steel Development Association, presenting seminars, writing technical articles and providing advice to architects, engineers, project managers and owners of institutions, buildings and infrastructure.

REGISTRATION FORM

Please register the following person/s for the “WEBINAR #3”.

PLEASE TYPE IN BLOCK LETTERS:-

1. Name: _____
Designation: _____
Email: _____
2. Name: _____
Designation: _____
Email: _____
3. Name: _____
Designation: _____
Email: _____
Company Name: _____

Date:
24 June 2021
(Thursday)

Time:
10.00 am – 11.30 am

COMPLIMENTARY

Organised and Supported by:

About MISIF

The Malaysian Iron & Steel Industry Federation (MISIF) is the national association representing the iron and steel manufacturing companies of Malaysia. Among its many activities, MISIF provides subsector group management and in this instance, this workshop is to support promotional activities of the MISIF Stainless Steel Group.

About NI

Nickel Institute (NI) is the global association of most of the world's primary nickel producers. The NI supports and grows markets for new and existing nickel applications which naturally includes stainless steel. NI also promotes good science, asset management and socioeconomic benefit as the basis for public policy and regulation.

About IMOA

The International Molybdenum Association (IMOA) is a nonprofit trade association, representing the majority of the molybdenum industry worldwide. IMOA promotes appropriate molybdenum use through education, publications and targeted research projects. It also seeks to ensure appropriate regulation of molybdenum and its compounds, based on sound science.

INTERNATIONAL MOLYBDENUM ASSOCIATION
THE VOICE OF THE MOLYBDENUM INDUSTRY
